Classroom

Friday, April 02, 2010
11:04 AM

The first step in creating a test is to click on the classroom tab on the home page. Once the classroom page is open you will click on 'create test'.

Normal Test

Tuesday, April 06, 2010
4:04 PM

You will have four options - select 'Normal Test'.

Step One

Tuesday, April 06, 2010
4:09 PM

The 1st step in creating a test is to set the properties and parameters of the assessment.

Step 2

Tuesday, April 06, 2010
4:12 PM

Select the class you which to administer the test to.

Step 3

Tuesday, April 06, 2010
4:17 PM

Title the test and provide instructions for students. I don't change anything else. Click save.

Step 4

Tuesday, April 06, 2010
4:21 PM

The step is to automatically find content for the test.

Selecting Grade Level Standards

Tuesday, April 06, 2010
4:24 PM

Select the standards, for mathematics I suggest using: SD Content Standards (without supporting skills) 2004 (Mathematics). Also, select the grade level. I suggest using a wider range than just one grade level. Example - If you're developing a test for 7th grade use 6th - 8th grade standards.

Selecting Specific Standards

Tuesday, April 06, 2010
4:34 PM

Toggle on the standards that you wish to test over. You can select as many as you want. I try to select just a few the first time through, it makes selecting questions easier. You can always go back and add or delete questions.

I have selected both of these.

Select Questions

Tuesday, April 06, 2010
4:38 PM

Select the actual questions.

29 possible ?'s

Finished

Tuesday, April 06, 2010
4:46 PM

Once you have selected all the questions - you want to save the test. You can either select more standards to find more questions or close it. When you close it you can find the test under 'classroom', and then select the class you created it in. To administer it, just activate it.

Display all your classes

To activate click, Save, test ID will be provided.
