Sharing Tests

Friday, April 02, 2010
11:04 AM

Sharing tests allows you to share tests with other teachers in the district and share tests with yourself. If I create a test for one class I can just share/copy to another class. That way I don't have to create huge classes for multiple sections of the same course that I teach. It allows me to try different teaching strategies between classes and compare the results from each class. Finally, the same tests can be used from year to year by different teachers.

Inside the classroom page select 'share tests'.

Select test

Tuesday, April 06, 2010
5:07 PM

Before selecting a test to copy just click on the test and see if it is what you are looking for. If you like it just click copy. This page is showing that there is a total of 104 tests that are shared between the Madison HS educators.

Copy

Tuesday, April 06, 2010
5:14 PM
Once you click copy all you need to do is assign the test to a class, save and activate it.
